

Using a problem-based approach to solving biological, physiological, and medical issues.

Coursework

- A.P. Biology-2 credits (1 weighted, 1 non-weighted)
- Body Systems-0.5 credit
- Biomed Art-0.5 credits
- Advanced Research In Science-Capstone Research Project –1 weighted credit

"Solving problems that nobody controls but nature."
--Dr. Robert Coridan-Scioto
graduate

"We've been teaching
"hypothesis free" science
classes. Darwin would roll over
in his grave."
--Elaine Morgan

BELIEVE IN YOUR VISION

BIOMED

"The significant problems we face
cannot be solved at the same level of
thinking we were at when we created
them."

— Albert Einstein

Imagine....

.... an enriching 2 period program that is open to students from *all three high schools* through an application process. Participating students will travel to the Emerald Campus. Students will use a problem-based approach to develop a strong foundation into the practices of biomedical professionals including multiple guest speakers, field trips, and culminating with an authentic biomedical research investigation.

Future Biomedical Professionals

Gain valuable experience and knowledge in all aspects of biomedical research and practice right here in Dublin City Schools.

Building on the core biological concepts learned through the A.P. Biology curriculum, students will gain a thorough understanding of the workings of the human body.

Biological problems and solutions will be investigated through authentic case studies, inquiry-based queries, and open experimentation.

Underlying practices will include technical writing, drawing, and biological research protocol.

Students will carry out a university level, yearlong, biomedical research project of their choice.

In addition, students will get a chance to explore medical professions in a variety of specialties through regular classroom visits from local partners.

Look forward to the opportunity to delve deep into your potential career of choice!

COMING in 2019-20: Optional 2nd year with additional research and internship experience!!!
